

# The ATN Advantage

**The Australian Technology Network (ATN) is recognised as a global leader of a new generation of universities.**

Building Partnerships. Finding Solutions.

**The ATN brings together five of the most innovative and enterprising universities in Australia: QUT, University of Technology Sydney, RMIT University, University of South Australia and Curtin University.**

**Collaboration has always been important for the ATN and its members, and students are at the heart of everything we do.**

Our commitment to deliver practical results through real-world research increasingly makes us industry's partner of choice.

Our graduates lead changes in society, provide innovative solutions to global problems and are uniquely placed to contribute and shape careers of the future. They become leaders in business and community and enjoy a salary earning premium.

The ATN runs Australia's only national Industry Doctoral Training Centre (IDTC), an industry-focused initiative in research training.

We invest over \$1 billion annually on real-world research and experimental development.

We are also the leading participants in Australia's Cooperative Research Centres linking government, industry and researchers.

#### ATN's National Network

of our assessed research is ranked at world class or above (Excellence in Research for Australia (ERA) 2015 initiative).

of our research funding has come from industry since 2010.

of Australia's international students choose our universities.

of all graduates are educated at our universities.
